1 [Software process support through software configuration management](#)

Peter P. FEILER

 October 1990 Proceedings of the 5th international software process
workshop on Experience with software process models

Publisher: IEEE Computer Society Press

 Full text available: [pdf\(258.73 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Software development embodies a range of software processes. Such processes can be captured in software process models. Two of the reasons for describing software processes through models are to document and communicate a particular process to others, ...

C. V. Ravi

 January 1975 **ACM 75**: Proceedings of the 1975 annual conference

Publisher: ACM

 Full text available: [pdf\(450.91 KB\)](#) Additional Information: [full citation](#), [abstract](#),
[references](#), [index terms](#)

The design of a file system for a multiprocessor interactive computer system is described. The architecture of the computer system is such that direct access to a resource allocated to a process is not allowed to any other process. Thus, sharing of files ...

Karen E. Huff

 October 1990 Proceedings of the 5th international software process
workshop on Experience with software process models

Publisher: IEEE Computer Society Press

 Full text available: [pdf\(255.12 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

As an example of a small part of the software process, consider the activities preliminary to building a new version of a software system; one task involves setting up an appropriate environment in which to apply the compilation and linking tools. This ...
